

REMARKS

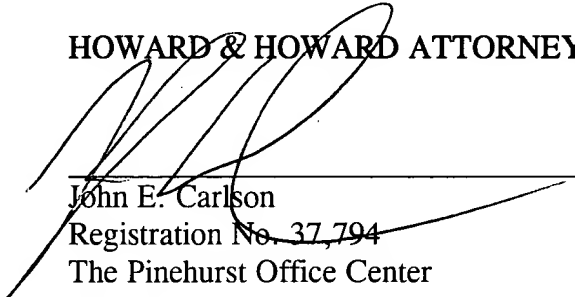

The Examiner has rejected claims 1-11 as being obvious over Japanese Patent No. 3211591 in view of Japanese Patent No. 6034382. Applicant has obtained translations of these patents, which are attached.

In Japanese Patent No. 6034382, the screen values for the color are read out of the video memory (page 41 of translation, paragraph [0075]) and then the palette is changed to effect the anti-aliasing (page 42 of translation, paragraph [0076]). In contrast, all of the claims of the present application require that the colors in the palette are utilized to provide the anti-aliasing, rather than changing the colors in the palette. In other words, the colors for providing anti-aliasing are provided in the palette at the beginning, rather than changing the colors in the palette subsequently. Therefore, all of the claims are properly allowable.

It is believed that no fees are due; however, if any fees are due, please charge all fees to our Deposit Account No. 08-2789 in the name of Howard & Howard.

Respectfully submitted,

HOWARD & HOWARD ATTORNEYS, P.C.
